Cities skylines traffic manager guide free pdf download 2016

Ctrl+Shift ++ t. You can also open a pull request on our Github page [Github.com]. Bugfix: When the IA parking is active, the bicycle lanes are not used (thanks to @informmanuel for reporting this problem) behavior to u-inversion optimized the improved information views 1.8.2, 12/12/2016 Bugfix : the taxis were not used (thanks to @delta àâ²k5) for the report) Bugfix: Fix mild UI in the Portefinita Speed Limits dialog 1.8.1, 12/1/2016 Updated translations: Polish, Chinese (Chinese (Simplified) Bug: MOD crashed during the loading of a second 1.8.0, 11/29 /2016 rescue updated to the version of the game 1.6.0-F4 new functionality: default speed limits new function: Parking AI (replaces "prohibiting" The cim from car taxable car ") new option: heavy vehicles prefer external lanes on the highways new option: Realistic speeds: Realistic speed new option: evacuation buses can ignore the rules of traffic (natural disasters DL C Request) New option: Evacuation buses can only be used to reach a refuge (DLC Natural DLC required) AI: improved selection of the lane, in particular on busy roads to: improved speed of medium lane The information on public transport, the view shows the transport application if the parking lot is activated Add information for information for the advice on city tools and for the vehicle if the parking lot The internal configuration extracted to the XML configuration file modified the main menu button is activated due to the changes of the user interface of the Main game the menu button is now mobile Remove the compatibility verification for traffic ++ V2 (Traffic ++ V2 is not more compatible TMPE why© to maintain compatibility no " more! feasible due to high effort) Updated translations: German, Portuguese, Russian, Dutch, Chinese (traditional) 1.7. 15, 26/10/2016 Bugfix: the timed traffic lights window disappears when you click the middle mouse button (thanks to @nexus and @mariobro14 for helping me identify the cause of this bug) 1.7.14, 18/10/2016 Updated for game version 1.5.2-f3 1.7.13, 15/09/2016 has implemented a permanent solution to fix problems with blocked caused by third party mod Added a button to reset blocked vehicles / cims (see mod menu settings) AI: Improved lane selection algorithm Bugfix: AI: The lane union does not work as Bugfix expected: Pedestrian light states were sometimes not stored correctly (thanks to Filip for highlighting this problem) 1.7.12, 09/09/2016 AI: Lane changes are reduced on congested road segments Time traffic lights should now correctly detect Bugfix trains and trams: Interface: Junction restriction icons sometimes disappear Chinese updated (simplified) translation 1.7.11, 09/01/2016 Updated to game version 1.5.1-f3 1.7.10, 08/31/2016 Players can now disable the deposition of Chinese pocket cars updated (simplified) translation Bugfix: The timed traffic lights flashed on Bugfix: Pedestrian traffic lights didn't work as Bugfix expected: When updating/removing/adding a road segment, the nearby junction restrictions were removed from Bugfix: Setting up vehicle restrictions involves trams (thanks to @chem for reporting) Bugfix: Manual states of pedestrian traffic lights were not handled properly Bugfix: The overlap of junction restrictions did not show all limited junctions 1.7.9, 22/08/2016 In-game traffic light states are now correctly rendered when showing "yellow" Removed negative effects on the use of public transport GUI: Traffic light states will no longer flicker! Performance improvements 1.7.8, 08/18/2016: Bugfix Sometimes the cameras got stuck (thanks to all the services and especially @Thilawyn, who provided us a piece of cake). The GUI: Improved display of traffic light arrow Improved performance during save 1.7.7, 08/16/2016: AI: Instead of traveling long distances, citizens now an AI car: Citizens will remember their last used means of transport (e.g. they will no longer drive to work and back by bus) AI: Increased costs of finding the route to cross road segments with speed limits. Addition of a graphical interface with speed limit "110": Graphical drag interface Capable: Improved scalability of windows with lower resolutions Improved performance during save save all rep uncorrectable error (thanks to @noaccount for reporting this problem) Further code improvements 1.7.2, 07/26/2016: Optimized UI overlay performance 1.7.1, 07/24/2016: Reverted "Buses now may only ignore lane arrows if driving on a bus lane" for now Bugfix: Trains were not despawning if no path could be calculated Workaround for third-party issue: TM:PE now detects if the calculation of total vehicle length fails 1.7.0, 07/23/2016: New feature: Traffic++ lane connector Buses now may only ignore lane arrows if driving on a bus lane Rewritten and simplified vehicle position tracking near timed traffic lights and priority signs for performance reasons Improved performance of priority sign rules AI: Cims now ignore junctions where pedestrian lights never change to green AI: Removed the need to define a lane changing probability AI: Tweaked lane changing parameters AI: Highway rules are automatically disabled at complex junctions (= more than 1 incoming and more than 1 outgoing roads) Improved UI performance if overlays are deactivated Simulation accuracy now also controls time intervals between traffic measurements Added compatibility detection for the Rainfall mod Improved fault-tolerance of the load/save system Default wait-flow balance is set to 0.8 Bugfix: Taxis were allowed to ignore lane arrows Bugfix: AI: Highway rules on left-hand traffic maps did not work the same as on right-hand traffic maps Bugfix: Upgrading a road segment next to a timed traffic light removed the detection for an inconsistent state (thanks to @ad.vissers for pointing out this problem) 1.6.22, 06/29/2016: AI: Taxis now may not ignore lane arrows and are using bus lanes whenever possible (thanks to @Cochy for pointing out this issue) AI: Buses may only ignore lane arrows while driving on a bus lane Bugfix: Traffic measurement at timed traffic lights was incorrect 1.6.22, 06/21/2016: Speed/vehicle restrictions may now be applied to all road segments between two aro ititrd
